BRIAN CHERUIYOT · AI CREATOR & EDUCATOR

STUDY TOOL

Your 30-Minute Study Planner

A repeatable half-hour routine and weekly study map for learning one manageable skill through practice and reflection.

> **How to use this resource:** Choose one idea, adapt it to your needs, and review results carefully. AI tools can make mistakes; check important information and protect private details.

Set one small learning target

- Write an outcome you can demonstrate: explain a term, complete one exercise, or compare two results.
- Starting point: what do you already know?
- Available days and time: what can you realistically protect?
- How will you know you made progress? Choose a small observable check.

The 30-minute session

- Minutes 0–5 · Recall: write what you remember before reopening notes.
- Minutes 5–15 · Learn: study one short section or example from a source you trust.
- Minutes 15–25 · Practice: solve, explain, create, or try one small task.
- Minutes 25–30 · Review: record what worked, what confused you, and the next step.

Flexible one-week map

- Day 1 · Define your goal and list questions.
- Day 2 · Learn one key concept and write a short explanation.
- Day 3 · Work through one example without rushing.
- Day 4 · Practice a new example and note mistakes.
- Day 5 · Explain the concept from memory or teach it to someone.
- Day 6 · Revisit the hardest part; use a trusted source to check it.
- Day 7 · Review progress and choose the next small goal.
- Move, shorten, or skip a session when life requires it. Consistency matters more than a perfect schedule.

Reusable session log

- Date and topic: _____
- What I recalled first: _____
- Practice completed: _____
- One thing I understand better: _____
- One question to resolve: _____
- Next small step: _____

Make learning stick

- Use retrieval: close the source and try to recall the idea.
- Space practice: revisit a concept on another day.
- Interleave carefully: compare related ideas after learning each one.
- Check understanding: use a worked solution or reliable reference.
- Treat AI explanations as drafts; verify important facts and examples.

Educational resource prepared for personal learning. Adapt the worksheets to your own needs. AI output is not a substitute for professional advice in legal, medical, financial, or other high-stakes situations.
