PROMPT COLLECTION

# The Everyday Writing Prompt Pack

A practical collection for brainstorming, outlining, rewriting, and proofreading—designed to keep your voice and judgment in the loop.

> **How to use this resource:** Choose one idea, adapt it to your needs, and review results carefully. AI tools can make mistakes; check important information and protect private details.

## A quick prompt recipe

- Name the task: what do you want help doing?
- Add context: what details change the answer?
- Name the reader: who is this for?
- Set boundaries: length, tone, format, exclusions.
- Ask for a reviewable result: headings, options, checklist, or steps.

## Brainstorm and outline

- Generate 12 article ideas about [topic] for [audience]. Make each idea distinct; add a one-sentence angle and a question the reader may have. Avoid [excluded topics].
- Create a three-part outline for [subject]. The goal is [goal], the reader knows [starting knowledge], and the result should fit [length]. Mark assumptions to confirm.
- Suggest five examples that could clarify [concept]. For each, explain what it illustrates and what it does not prove.

## Draft and improve

- Turn these notes into a first draft for [audience]. Preserve every factual claim exactly; use [tone] and keep it under [length]. Put questions for me in brackets.
- Rewrite this paragraph for clarity, not new facts. Show the original meaning in one sentence, then offer two edited versions: concise and warm.
- Review the draft for confusing sections and repeated ideas. List the three biggest opportunities first; do not rewrite yet.

## Proofread and adapt

- Check this text for grammar and punctuation. Return only suggested edits and a short reason; do not change names, numbers, or meaning.
- Adapt this message for [channel]. Keep the core point and call to action; note any details I must verify before publishing.
- Create a short headline, a descriptive subheading, and three alternative opening lines for this draft. Do not invent statistics.

## Keep authorship and quality

- Use generated text as a draft, not a substitute for your expertise. Confirm names, dates, quotations, claims, and permissions before publishing.
- A useful follow-up is narrow: “Keep the same structure, make paragraph two clearer, and list what you changed.”
- Avoid pasting confidential client material, passwords, financial details, or private personal information into general-purpose AI tools.

## Your reusable checklist

- Task and audience are clear.
- Relevant context is included; unnecessary private information is not.
- The requested format and limits are specific.
- The output separates facts from suggestions.
- Every important claim has been checked by me.
